[Gynaecology](#) or gynecology is the medical practice dealing with the health of the female reproductive system (vagina, uterus, and ovaries) and the breasts. Outside medicine, the term means "the science of women". Its counterpart is andrology, which deals with medical issues specific to the male reproductive system. Almost all modern [gynaecologists](#) are also obstetricians. In many areas, the specialities of gynaecology and obstetrics overlap.

Gynaecology are often managed through discussion on multi-disciplinary [gynaecology](#) conferences where medical gynaecologists, surgical gynaecologists, radiation gynaecologists, pathologists and radiologists meet to find the best possible management for an individual patient considering the physical, social, psychological, emotional, and financial status of the patient. It is very important for gynaecologists to keep updated with respect to the latest advancements in gynaecology, as changes in management of gynaec problems are quite common.

The [Reproductive Medicine & Women Healthcare 2020](#) is an event that aims to explore the Innovative approaches for current Investigations, Treatment and Preventive Strategies scheduled to be held on October 07-08, 2020 at Barcelona, Spain. The conference will serve as a platform to bring together leading gynecologist and its Causes. Reproductive Medicine & Women Healthcare 2020 will also see discussions covering topics such as Gynecology And Obstetrics, Gynecology Nurse And Midwifery, Gynecologic Cancer, Recent Advances In Gynecology, Women Health Related Issues, Effects Of Drugs On Pregnancy, Breast Cancer, Pregnancy And Childbirth, Maternal Fetal Medicine, Sexual And Reproductive Health, Urogynecology, Male Reproductive Cancers, Infertility, Disorders In Gynecology and Cosmetic Gynecology.

As with all surgical specialties, gynaecologists may employ medical or surgical therapies (or many times, both), depending on the exact nature of the problem that they are treating. Pre- and post-operative medical management will often employ many standard drug

therapies, such as antibiotics, diuretics, antihypertensives, and antiemetics. Additionally, gynaecologists make frequent use of specialized hormone-modulating therapies (such as Clomifene citrate and hormonal contraception) to treat disorders of the female genital tract that are responsive to pituitary or gonadal signals.

Our Theme: Focus on Next Generation to Improve the Obstetrics & Gynecology Care celebrates our achievements and examines current and future challenges and celebrates the diversity of our health care system.

Reproductive Medicine & Women Healthcare 2020 offers a cutting edge program of Renowned International Speakers, attracting over 300+ experts in fertility, Assisted conception, Sexual health and Reproductive biology.
